

RENOVATION

VED VOLDEN - COPENHAGEN, DK

FACTS

Year: 2014-15 (renovering)

Contractor: Øens Murerfirma A/S

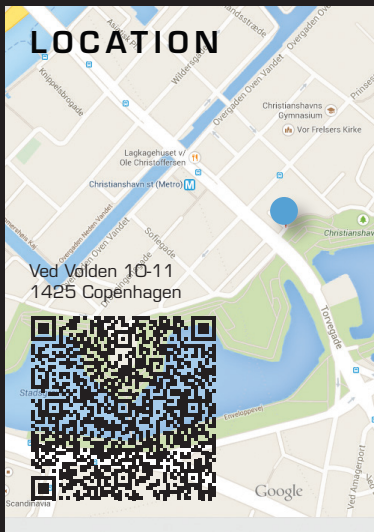

Engineer: Bang & Beenfeldt

Hi-Con has supplied the project with 250 balconies in seven different variations and 120 window boxes. Both the balconies and window boxes are cast in light CRC i2® with a thickness of 60-95 mm.

The architecture from the 1930th is preserved, why there is strict demands to the shape of the new balconies. The goal was to recreate the architectural expression from the original balconies, minimize the weight of the balconies and comply the demands of today's building construction.
